PIRON WORK

How to use Piron Work

A plain guide for customers, providers and companies in Cambodia. Part 1 of 2.

For everyone

Version of 16 October 2026 | app.piron.tech
Questions: pironbypor@gmail.com
The second guide, Piron Work Space, is for the owner only.

11. The identity check
12. Companies and teams
13. Payments tab
14. Notifications and settings
15. Staying safe
16. Problems and answers

1. What Piron Work is

Piron Work is a place in Phnom Penh where people post work they need done, offer a skill, share what they know, and find volunteers. A customer and a provider agree on the work, the work is done and confirmed, and the provider builds a record of finished jobs that others can see.

> **Piron Work does not take, hold or move money.** You and the other person agree the price and pay each other directly, in cash or by ABA, Wing or bank. The app only keeps records of what was agreed and what was paid.

- **Languages:** Khmer and English. Switch with the `ខ្មែរ` / `EN` buttons at the top of the website.
- **No ads, no ranking:** posts are shown newest first.

2. Getting started

Create an account

1. Open app.piron.tech and choose `Log in`, then create an account.
2. Enter your name, email and a password with at least 8 characters.
3. Check your email and tap the confirmation link, then log in.
4. Open **Profile** and follow the **Get started** card: complete your profile, start the identity check, write your first post.

Log in again

Use your email and password. If you forget the password, choose `Reset password`.

If you forgot your password

1. Open **Reset password** and type your email. Press `Send reset link`.
2. Open the **newest** email from Piron Work and tap the link once. It works in any browser or phone.
3. Type a new password: at least 8 characters, different from your old one, not an easy word.
4. Press `Save new password`. You are logged in.

> **Tip:** every new request cancels the older email. If a link says it has expired, ask for one new link and use only that one.

Use it like a phone app

Open app.piron.tech in your phone browser and choose **Add to home screen**. Then open **Settings** inside the app and switch on phone notifications so you hear about quotes and messages.

---

3. The screens

The top bar

Button	What it does
Logo “Piron Work”	Takes you back to the start.
Menu (three lines)	Opens your name, **Notifications**, **Settings** and **Log out**.
Bell	Your notifications. The number is what you have not read.
Your picture	Your profile.

The bottom bar

Tab	What is there
Home	All posts, a search bar and a filter. The `Post` button is here.
Payments	Invoices, your payout account, and team pay. See section 13.
Services	Find providers by name, role, skill, category and city.
Jobs	Job listings, job alerts and your applications.
Messages	Your conversations and group chats.

Home: search and filter

Type in the search bar to find posts by words in the title or text. Use the drop-down under it to show only **Job offers**, **Skill offers** or **Share knowledge** posts.

Drop-down lists

Every list in the app works the same way: tap it, pick a line, and the chosen line gets a tick. Long lists have a search box at the top.

4. Posting

Press the **Post** button on Home. You see four tiles:

Tile	Use it when
Post a job offer	You need something done. Add a title, what you need, an optional budget, deadline, deliverables and whether it can be done remotely.
Offer a skill	You are a provider and want people to find you.
Share what you know	You want to help others with a tip or answer.
Volunteer	You want to find or organise volunteer activities (section 9).

1. Choose a tile. The form opens with that kind chosen.
2. Fill in the title and text. You can use the microphone button to speak instead of typing (on devices that allow it).
3. Choose a category if it helps people find you.
4. Press **Post**. The post appears on Home.

Shortcut: on the form there are ready-made templates for common jobs such as product photos, menu design or logo refresh. Pick one and change anything.

5. Finding and hiring

Find a provider

1. Open **Services**. Search by name, role or skill.
2. Narrow the list with the category, city and sort drop-downs, and the **Remote** box.
3. Open a provider to see their record, reviews, portfolio and the green **Identity checked** mark.
4. Press **Say hello** to send one short message request, **Invite to a project** to ask them to quote on a post of yours, or **Request a quote**. Press **Keep** to save the provider for later.

From request to finished job

1. **You post** a job offer (or invite one provider you like).

2. **Providers send quotes** with a price and number of days.
3. **You accept one quote** with `Accept quote`. This opens the job and a chat with that provider.
4. **The provider delivers.** They press `Mark as delivered`.
5. **You confirm.** Press `Confirm completion` when you are happy. The job counts on the provider's record.
6. **You rate the work.** Choose stars, pick up to three skills that stood out, and press `Send review`.

A progress bar on the job shows the four steps: Quote accepted, Work delivered, Customer confirmed, Review left.

> **Hire again:** on your finished job or the provider's page, choose `Hire again`. The old scope is filled in and sent to that provider first. If they do not answer in 24 hours it opens to everyone, unless you choose to open it now.

If something goes wrong

Talk first in the job chat. If you cannot agree, you or the provider can press `Open a dispute` on the job; the Piron Work team reads both sides.

---

6. Doing the work

1. Turn on **Available this week** on your Profile when you can take work. It lasts 7 days and shows others you are free.
2. Press `Send a quote` on the post: price, delivery days and a short note.
3. When your quote is accepted, use the job chat to agree the details.
4. When finished, press `Mark as delivered` and tell the customer in the chat.
5. After the customer confirms, create an invoice if you want a record (section 13).

Your record (finished jobs and reviews) is shown on your profile. You can hide it with **Show my work record** in Settings.

---

7. The Jobs tab

Companies and people post **job listings** here: part time, short term, freelance or project work, with pay shown as an amount per hour, day, shift or project.

- **Look:** open a listing, read the details, and press the apply button with a short note.
- **Job alerts:** choose a category and a province or city. When a matching listing appears you get a notification.

- **Post a listing:** open the new job form from the Jobs tab. Choose the type, pay, city and whether remote work is possible.

8. Messages

- **First contact:** if a person has not opened messages to you yet, you send one short request (`Say hello`). They can accept or say not now. You can send only a few requests a day.
- **Chats:** after a quote is accepted, or a request is accepted, you have a normal conversation. Files and photos can be sent.
- **Group chats:** start one from your people or a project. Activities and companies have their own group chat.
- **Block:** on a provider page, press `Block this person`. They cannot message you. Unblock in Settings, under Blocked people.
- **Report:** use the report link at the bottom of a post, message or profile to tell the team about scams or abuse.

9. Volunteer activities

1. On the Post screen choose **Volunteer**, or open **Activities**.
2. Pick a province in the drop-down and press `Show`.
3. Open an activity and press `Join`. If it is full you go on the waiting list and are moved up automatically when a place opens.
4. You get a reminder before it starts and a group chat with the other volunteers.

> **Organising:** to create an activity you need a checked identity (section 11). Set the title, place, time and number of people.

10. Your profile

Open your profile with your picture in the top bar. It is one hub with a card for each way you use Piron Work:

Card	What it is for
Get started	Three steps: complete your profile, start the identity check, write your first post. It disappears when all three are done.
I need work done	Find a service, post a project, and see your open requests and saved providers.

I offer a service	Your public card: role, skills, price from, city, and the **Available this week** switch.
My companies	Companies you own or belong to, and **Add company**.
Looking for work	Your applications and job alerts.

Use **Edit profile** to change your name, role, bio, city, category and skills, and to add a picture.

11. The identity check

A green **Identity checked** mark tells others a person has shown a real ID to the team. It is needed to organise activities and to receive a payout account approval.

1. Open **Profile**, then **Identity check**.
2. **Step 1:** type your legal name, ID type (National ID card, Passport or Other), ID number and date of birth exactly as on the ID.
3. **Step 2:** take a photo of the front of the ID. Make sure the text is readable and the whole card is in the frame.
4. **Step 3:** take a selfie holding the ID next to your face.
5. Press `Submit for review`. A person checks it within two working days and you get a notification.

> Only Piron Work staff see the photos and details. They are never shown on your profile.

12. Companies and teams

A company has its own page, team, documents, shifts and tasks. Create one from **Profile → My companies → Add company**.

Role	Can do
Owner	Everything, and the only one who can **publish a document** or turn the public page on or off.
Manager	Invite people, schedule shifts, assign tasks, set pay terms, upload documents.
Member	See their own shifts, tasks and pay terms, clock in and out, mark their tasks done.

Inside a company

- **Team:** invite people by their profile. They accept from their notifications. You can show “Works at” on a profile if the person agrees.
- **Documents:** upload files and give each one a level: **Private** (managers only), **Team** (everyone in the company) or **Public** (on the company page). Only the owner can make a document public. Visitors never see Private or Team files.

- **Public page:** a page anyone can open with your open projects, jobs, activities and public documents. The owner switches it on.
- **Schedule:** managers add a shift for a person with a date and time. Members press **Clock in** from 30 minutes before the shift until it ends, and **Clock out** when they finish.
- **Tasks:** managers create a task, optionally assign it and set a due date. The assigned member moves it to Doing and Done.
- **Pay terms:** a manager sets job title, duties and rate (per hour, day or month) for each person and keeps simple pay records. Members see only their own.

---

13. Payments tab

Everything about money is in one place. Remember: records only, no money moves through Piron Work, and these are not tax invoices.

Part	What it does
To receive / To pay	Totals of your open invoices.
Create an invoice	Lists your accepted jobs. Choose one and set the amount. An invoice cannot be more than the agreed price of the job.
Invoices and payments	Invoices you issued and invoices sent to you.
Payout account	Where you want to be paid: ABA, Wing or another bank, with the name and number. The team checks that the name matches your ID.
Team pay terms and records	Your rate and hours for each company you belong to.

How an invoice moves

1. The **provider** creates the invoice and shares it with the customer. It can be printed or saved as PDF.
2. The **customer** pays the provider directly, then presses **I have paid** and chooses how and when.
3. The **provider** answers **Did the payment arrive?** with **Yes, payment received** or **Not received**. If the customer paid in person and did not mark it, the provider can use **Record a payment received**.
4. The invoice becomes **Received**. The provider can press **Cancel this invoice** while it is not paid.

---

14. Notifications and settings

Open **Menu** → **Settings**.

- **Notifications on your phone:** switch phone notifications on for this device.
- **Email notifications:** a quiet backup. You get an email only when a quote is accepted or work is delivered.
- **What to notify me about:** switch off any of these groups: Projects and quotes, Messages, Activities, Reviews, Team work, Invoices and pay. Identity results, disputes and the job alerts you set up always arrive.
- **Reminders:** a nudge for quotes waiting, work to confirm, deadlines, availability ending and activities tomorrow.
- **Show my work record:** choose whether confirmed jobs appear on your profile.
- **Language and Blocked people** are here too.

15. Staying safe

- **Look for the green mark.** *Identity checked* means staff saw a real ID. Not having it does not mean a scam, but ask more questions.
- **Agree the price in writing** inside the job chat before work starts, and pay only as agreed.
- **Pay the provider directly.** Piron Work staff will never ask you to send money to them or share a password or code.
- **Meet in a public place** for the first meeting, and tell someone where you are going.
- **Report and block.** If someone scams, threatens or spams, report the post or person and block them. The team reviews reports.
- **Paused accounts.** The team can pause an account that breaks the rules. A paused person can log in but cannot post, quote or message.
- **Your data.** Read the Privacy and Terms pages linked at the bottom of the website. ID photos are kept private.

16. Problems and answers

Problem	What to do
The reset link says it has expired	Ask for one new link and use only the newest email. Open it once.
I cannot find the Payments tab	It appears at the bottom, next to Home. If it is missing, the team has switched it off for now.
I cannot send a message to someone	Send one short request (**Say hello**). If they blocked you, the button is not available.
I cannot create an activity	You need a checked identity first (section 11).

My invoice amount is refused	It is more than the agreed price of the job. Lower it, or agree the new price in the quote first.
It says “Your account is paused”	The team paused it. Write to pironbypor@gmail.com.
Something shows “Something went wrong”	Press **Try again**. The team is told automatically. If it keeps happening, write to pironbypor@gmail.com with what you pressed.
A page is in the wrong language	Use the **ខ្មែរ** / **EN** buttons at the top of the website.

Piron Work is run from Phnom Penh. Questions: **pironbypor@gmail.com**
